Epic

The screenshot shows a Jira Epic page with a dark theme. At the top left is a purple lightning bolt icon and the text 'SF-1'. At the top right are three buttons: an eye icon with '1', a share icon, and a three-dot menu icon. Below this is a yellow square icon followed by the title 'Student Campaign Management' in bold. Under the title is a row of buttons: 'To Do' with a dropdown arrow, a lightning bolt icon, 'Improve Epic' with a star icon, an ellipsis, and a plus sign. Below this is a section titled 'Description' with a dropdown arrow. The description text reads: 'This Epic enables students to create and manage crowdfunding campaigns for their startup ventures. It covers campaign creation, campaign details, funding goals, and managing campaign progress so that student entrepreneurs can effectively raise funds and manage their ventures.' Below the description is a section titled 'Attachments' with a dropdown arrow. At the bottom of the attachments section is a dashed border containing a purple profile icon, a button labeled 'Add attachment', and a button labeled 'Create project plan' with a 'Try' badge.

Sprint Report

Burnt Down Chart

REFLECTION Questions and Answers

1. Did your estimations reflect the actual effort?

Yes, the story point estimations reasonably reflected the actual effort. Stories with higher points required more effort or complexity, while simpler stories had fewer points.

Completing the stories during the sprint helped us understand the relationship between estimated effort and actual work.

2. Was your backlog well-prioritized?

Yes, the backlog was prioritized based on the importance and business value of the user stories. Higher-priority stories related to important crowdfunding functions were considered first, allowing the team to focus on the most valuable requirements.

3. How did your simulated sprint align with your plan?

The simulated sprint generally aligned with our plan. We selected the required user stories, assigned story points, and moved the stories through To Do → In Progress → Done. This helped us understand how planned work is executed during a sprint.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed how much work remained during the sprint and helped us understand the team's progress and capacity. As stories were completed, the remaining work decreased. It also showed whether the team was progressing according to the planned sprint schedule.
