

Student Startup Crowdfunding Platform

PROBLEM STATEMENT 40

A VINAY – PES1UG24CS647

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale (short)
FR-0 01	Functional	The system shall collect backer pledges and disburse funds to the student venture in tranches only upon verification of predetermined project milestones.	High	Pass: Milestone evidence is reviewed and the corresponding tranche is released. Fail: Funds are disbursed without milestone sign-off.	Ensures funds are released only after verified project progress.
FR-0 02	Functional	The system shall allow a Student Founder to create and manage a crowdfunding campaign with funding targets and project details.	High	Pass: A Student Founder can enter campaign details and funding target, and the campaign is successfully created. Fail: Campaign is not created when valid details are provided.	Provides the basic functionality for student ventures to raise funds.
FR-0 03	Functional	The system shall allow a Campaign Backer to select an available	Medium	Pass: The selected reward tier and pledged	Enables backers to support

		reward tier and submit a pledge to a crowdfunding campaign.		amount are recorded successfully. Fail: The pledge or selected reward tier is not recorded.	student ventures and select rewards.
FR-0 04	Functional	The system shall allow the Student Founder to submit evidence of completed project milestones for faculty committee review.	High	Pass: Milestone evidence is submitted and made available to the faculty committee for review. Fail: Evidence is not recorded or submitted successfully.	Provides evidence required for milestone verification.
FR-0 05	Functional	The system shall allow the Faculty Committee to review milestone evidence and approve or reject a milestone before the corresponding funds are released.	High	Pass: The committee's approval or rejection is recorded, and funds are released only after approval. Fail: Funds are released without committee approval.	Ensures controlled and verified disbursement of campaign funds.
NFR001	Nonfunc.	The payment processing gateway must comply with payment security terms with tokenized payment authorizations.	High	Pass: Security testing confirms payment security terms and payment credentials are tokenized. Fail:	Protects backer payment information and improves payment security.

				Payment credentials are stored or processed without required security controls.	
NFR002	Nonfunc.	The system shall protect campaign, pledge, milestone, and payment information from unauthorized access.	Medium	Pass: Unauthorized users are denied access to restricted information during security testing. Fail: An unauthorized user can access restricted data.	Protects sensitive crowdfunding and user information.

ACTORS:

- Student Founder — creates/manages the campaign and submits milestone details.
- Campaign Backer — selects a reward tier and makes a pledge.
- Faculty Committee Member — reviews the submitted milestone and approves or rejects it.

Use Cases

1. Create Campaign

Student creates the crowdfunding campaign.

2. Manage Campaign

Student updates/manages campaign details.

3. Make Pledge

Backer promises an amount of money.

4. Select Reward Tier

Backer chooses the reward they want.

5. Submit Milestone

Student submits completed milestone details/evidence.

6. Review Milestone

Faculty member checks the submitted milestone.

7. Approve/Reject Milestone

Faculty member approves or rejects the milestone.

8. Release Funds

Funds are released after the milestone is approved.

USE CASES AND ACTORS

Student Founder

- 1) Create Campaign
- 2) Manage Campaign
- 3) Submit Milestone

Campaign Backer

- 1) Select Reward Tier
- 2) Make Pledge

Faculty Committee Member

- 1) Review Milestone
- 2) Approve/Reject Milestone
