

Use-Case Flow Specification – Make Pledge

Use Case: Make Pledge

Actor: Campaign Backer

Preconditions

1. The backer is logged into the system.
2. A crowdfunding campaign is available.
3. The campaign has available reward tiers.

Postconditions

1. The pledge is recorded in the system.
2. The selected reward tier is recorded.
3. A confirmation message is shown to the backer.

Main Success Scenario

1. The backer opens a crowdfunding campaign.
2. The system displays the available reward tiers.
3. The backer selects a reward tier.
4. The system displays the selected reward and pledge amount.
5. The backer confirms the pledge.
6. The system processes the payment.
7. The system records the pledge and selected reward.
8. The system displays a confirmation message.

Alternate Flow – Payment Failure

- 6a. The payment fails.
- 6b. The system displays a payment failed message.
- 6c. The backer is asked to try the payment again.
- 6d. If the payment succeeds, the system records the pledge.
- 6e. If the payment fails again, the system cancels the pledge.
